Modula Lift

Available in a range of sizes and capacities, the Modula Lift has become the go-to solution for businesses around the world as they seek to modernize their processes, reposition their spaces and drive efficiency.

How does a Modula Lift work?

Modula's vertical lift modules (VLMs) are fully automated vertical storage systems that take up a minimum footprint by taking advantage of high ceilings, thus maximizing storage potential. Items can be stored up to 53 feet high in a safe and secure unit that automatically delivers them to an operator with a touch on the user-friendly Copilot controller or scan of a barcode.

No more time wasted searching for items. The right part is delivered to the right person at the optimum ergonomic retrieval height.

Benefits at a Glance

IMPROVES EFFICIENCY

Fulfill orders efficiently without picking errors

MANAGES YOUR INVENTORY

Control stock levels and inventory movements with just one click

RECOVERS SPACE

Saves up to 90% of valuable floor space compared to traditional storage methods

SAVES TIME

Locate the parts and products you need instantly

INCREASES SECURITY

Choose storage that keeps your spare parts secure

REDUCES RISKS

No more climbing stairs or mezzanines to retrieve your goods

Think it's a big investment?

100% ROI
12-18 months on average

THROUGHPUT OF
UP TO 120 TRAYS/HOUR

SELF-CENTERING
PULLEYS

INTUITIVE SOFTWARE

Technical Features

<p>UNIT HEIGHTS from 10'10" (3,300 mm) to 52'10" (16,100 mm)</p>	<p>THROUGHPUT up to 120 trays/hr (depending on configuration)</p>
<p>UNIT HEIGHT INCREMENT 7.87" (200 mm)</p>	<p>OPERATOR INTERFACE industrial console with 10.4" touch screen (Copilot)</p>
<p>TRAY WIDTHS from 59.05" (1,500 mm) to 161.41" (4,100 mm)</p>	<p>NUMBER OF BAYS up to 3, front and rear of the units or on multiple floors</p>
<p>TRAY DEPTHS 25.75" (654 mm) & 33.74" (857 mm)</p>	<p>TYPES OF BAYS internal or external, single or dual tray delivery</p>
<p>NET TRAY PAYLOAD CAPACITIES 551lbs(250kg), 1,102lbs(500kg), 1,653lbs(750kg)&2,182lbs(990kg)</p>	<p>GROSS TOTAL PAYLOAD up to 200,000 lbs (90,000 kg) depending on the configuration</p>

Modula Lift **ADVANTAGES**

Saves Space & Reduces Operations Cost

Saves up to 90% of valuable floor space compared to traditional storage methods and makes space available for future growth needs.

Without Modula

With Modula: floor space recovery up to 90%

Increases Productivity and Accuracy

Vertical lift modules automatically deliver items to the operator with a simple touch on the Copilot console or a scan of a barcode.

This feature drastically reduces handling times, both in picking and replenishing, as there is no walking back and forth to find and retrieve goods.

Tray delivered to the bay in under 30 seconds

Reduce travel time for parts up to 90%

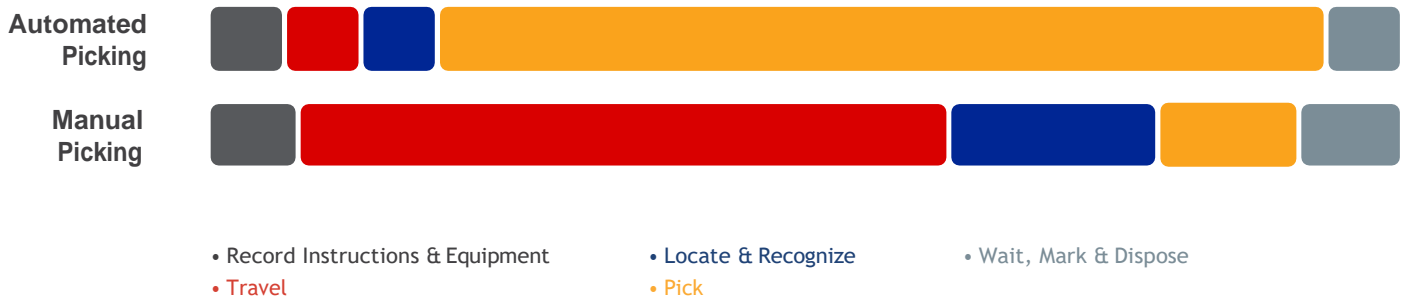

Thanks to the simple inventory management software and the visual picking aids, operators can quickly and easily identify the items needed, dramatically reducing picking errors.

More Orders in Less Time

Operators can process even complex orders in the shortest possible time and with the highest quality level, even during peak workload times, as they don't have to wait between jobs when retrieving parts.

Industry studies have shown that vertical storage solutions can increase workforce productivity by up to 85% because one worker is able to handle the same volume of work previously performed by multiple operators.

Automated vs Manual Picking: Percentage of Time Spent Picking

Stock Density Optimization

A height-detection system determines vertical dimensions of items as the tray is put away, calculating adjustments in real time to maximize storage density within the unit.

Designed with Worker Ergonomics and Safety in Mind

Following the parts to picker's principle, these automated storage systems deliver the items to the fixed operator's location where the picking operations take place. Walking time for parts retrieval is reduced up to 90% when compared to static shelving.

This feature significantly minimizes the risk of injury from motion and provides maximum safety for personnel in even the most demanding working conditions.

100% safe

100% ergonomical

Security & Inventory Control

A reliable locking and validation feature plays a key role in many industries. Every unit is password protected, allowing only authorized operators with a personal badge and/or access code entry to operate the machine. All picking operations are monitored and log-ins are tracked even down to specific trays, depending on the chosen level of security.

Tracking access to specific trays is also beneficial for inventory control, preventing operators from picking the same items or for highly valuable products to be stolen.

Magnetic Badge Reader

EKS Reader

RFID Reader

Flexible Integration & Scalable Design

Trays can be organized for every type/size of stored item. Thanks to our partitions and dividers, you can create the exact number of storage locations required, and their configurations can be adjusted at any time to accommodate changes in the size or quantity of your stored items or seasonal demands.

The modular design of the VLM ensures almost unlimited flexibility. The height can be modified and adjusted to optimize the unit for the ceiling height by adding or removing modules. If you change locations or move to a different site, your Modula VLM can be quickly adapted to the new height requirements.

What Can You Store in a Modula Lift?

The Modula Lift can store virtually any type of products or parts in different sizes, weights, heights and volumes
Typically, companies stock:

Tooling and drill bits

Reels and electronic components

Pharmaceuticals, boxes and cosmetics

Mechanical instruments

Tools and spare parts

Small parts and hardware

Bottles and labels

Spools, rope, chains

Bay Configurations for Every Operational Need

Operators can process even complex orders in the shortest possible time. Modula Lifts can be ordered in a variety of bay delivery methods, including:

- Internal bay
- External bay
- Dual-delivery bay
- Single-delivery bay
- Opposite bays on the front and rear of the units
- Bays on multiple floors

The dual-delivery option allows one tray to present the parts to an operator while the other is retrieving additional parts. Trays can deliver on two sides of the machine or on different levels of your facility. External bays can be useful when employing mechanical aid such as forklifts, cranes or hoists.

Single internal delivery

Single external delivery

Dual internal delivery

Dual external delivery

Different Bay Models for Every Product Height

Modula Lift is offered in 3 sizes of bays (S/M/XL) to accommodate different products heights:

- Maximum product height for single delivery level
27.36" / 35.24" / 50.98"
(695 / 895 / 1,295 mm)
- Maximum product height for dual delivery level
12.6"-12.6" / 12.6"- 20.47" / 20.47"-36.22"
(320-320 / 320-520 / 320-920 mm)

Modula Lift APPLICATIONS

Unlimited Integrations

The Modula Lift can integrate with other automated technologies to further enhance productivity and speed, including:

- Robots
- Put-to-light systems
- Zero-weight cranes
- Roller conveyors
- Manipulators

By connecting the WMS solution with existing ERP systems, the Lift can seamlessly blend into a company workflow.

Integration with anthropomorphic robots

Put-to-light systems connected to WMS

Integration with manipulators and cranes

Integration with conveyors

Flexible Installations

The Modula Lift can extend over different floors with access openings on the front and rear, allowing operations on multiple levels simultaneously. The units can also be installed outside of building to further expand storage space.

Insulated machines for outdoor installation

Multi-level installation

The Modula warehouse management system (WMS) is designed to operate automated storage equipment such as the Modula VLM, as well as conventional storage methods such as shelving and manual picking.

As one of the most intuitive and advanced software solutions on the market, Modula WMS seamlessly interfaces with almost all DMS and ERP systems, making processes such as receiving, picking, and putting away products faster and more accurate:

Modula WMS Benefits

- Increased picking and replenishment accuracy and efficiency
- Complete inventory visibility and control to drive performance and reduce costs
- Reduced paperwork - and the tedium and mistakes of manual processing
- Easy integration with existing ERP or DMS systems

Copilot Operator Console

An easy-to-use 10.4" touchscreen color display makes it intuitive for operators to retrieve what they need. The graphic visualization of the tray layout shows the user clearly where and what to select, and displays all requested information relating to picking or refilling operations, such as item code and quantity.

Modula Services

Whether you are planning to purchase or currently own a Modula product, our customer service team is here for you every step of the way. With support from both our in-house experts and our 70-plus dealers across North America, we're ready to assist throughout the lifecycle of your automated storage systems. Our services include installation, training, maintenance, emergencies, moves to new locations, and more.

Made in the USA

Modula products are made in the United States of America, which allows for speedier shipping times and quicker installation times for our North American customers.

About Modula

Modula designs and produces automated storage and retrieval systems that dramatically boost productivity and accuracy, reduce storage space requirements, and enhance worker safety and job satisfaction. The only U.S. manufacturer of vertical lift modules, Modula also offers horizontal carousels, warehouse management systems, and a host of accessories that make order picking quick and easy. Established in 1987, Modula has nine branches worldwide, a network of 100 distributors, and factories in the United States, Italy, and China.
